Journal of Non-Crystalline Solids 218 (1997) xi–xiv

JOURNAL OF NON-CRYSTALLINE SOLIDS

Contents

Preface: H.K. Pulker vii
Preface: H. Schmidt viii
Committees ix
Sponsors x
Contents xi

Section 1. Introductory session

Present trend and architect's expectation on coated glass
P. Samyn and M. Achten 1
Large volume coated glass production for architectural markets in North America
E.J. Wegener 7
Industrial production of coated glass: Future trends for expanding needs
A. Arnaud 12

Section 2. Advanced technologies by vacuum deposition

New approaches for reactive sputtering of dielectric materials on large scale substrates (*Invited lecture*)
G. Bräuer, J. Szczyrbowski and G. Teschner 19
Antireflective coatings on large scale substrates produced by reactive twin-magnetron sputtering
J. Szczyrbowski, G. Bräuer, G. Teschner and A. Zmelty 25
Low-resistivity ITO films by dc arc discharge ion plating for high duty LCDs (*Invited lecture*)
Y. Suzuki, F. Niino and K. Katoh 30
The use of ac power on cylindrical magnetrons (*Invited lecture*)
R.J. Hill and F. Jansen 35
Design of low emissivity systems based on a three-layer coating
P. Grosse, R. Hertling and T. Müggenburg 38
RF magnetron sputtering of polymers
H. Biederman, P. Bílková, J. Ježek, P. Hlídek and D. Slavínská 44
High power generators for medium frequency sputtering applications
T. Rettich and P. Wiedemuth 50
Reactive sputtering and the use of anodes for optical coatings
R.J. Hill 54
Formation of compositionally graded multilayer films by discharge gas flow modulation in magnetron sputtering
E. Kusano, A. Kinbara and I. Kondo 58
Equivalent circuit model for large-area ac magnetron sputtering of dielectrics
J.P. Lehan and C.K. Carniglia 62
Optical and mechanical properties of Cr and CrN_x films by dc magnetron sputtering
E. Ando and S. Suzuki 68

Optical and electrical properties of doped zinc oxide films prepared by ac reactive magnetron sputtering
B. Szyszka and S. Jäger 74

Section 3. Glass coating at atmospheric pressure

Chemical vapor deposition of coatings on glass (*Keynote lecture*)
R. Gordon 81

Anti-reflective coatings by APCVD using graded index layers (*Invited lecture*)
G.A. Neuman 92

Development of lightweight returnable bottles (*Invited lecture*)
M. Nakagawa, T. Amano and S. Yokokura 100

Functional ITO coatings on glasses by RF plasma mist technique in ambient atmosphere
R.W. Moss, D.H. Lee, K.D. Vuong, R.A. Condrate, Sr., X.W. Wang, M. DeMarco and J. Stuckey . . 105

Sol–gel derived coatings on glass (*Keynote lecture*)
D.R. Uhlmann, T. Suratwala, K. Davidson, J.M. Boulton and G. Teowee 113

Comparative study of SnO_2:Sb transparent conducting films produced by various coating and heat treatment techniques (*Invited lecture*)
M.A. Aegerter, A. Reich, D. Ganz, G. Gasparro, J. Pütz and T. Krajewski 123

Dip-coating of ITO films
Y. Takahashi, S. Okada, R. Bel Hadj Tahar, K. Nakano, T. Ban and Y. Ohya 129

Preparation of $ZnGa_2O_4$ thin film by sol–gel process and effect of reduction on its electric conductivity
T. Sei, Y. Nomura and T. Tsuchiya 135

Rare earth ion doped semiconducting films by spray pyrolysis
M.O. Abou-Helal and W.T. Seeber 139

Thick sol–gel coatings based on the B_2O_3–SiO_2 system
M.A. Villegas, M. Aparicio and A. Durán 146

Preparation of gold microcrystal-doped oxide optical coatings through adsorption of tetrachloroaurate ions on gel films
J. Matsuoka, R. Naruse, H. Nasu and K. Kamiya 151

Angle-dependent dip-coating technique (ADDC): an improved method for the production of optical filters
A. Eberle and A. Reich 156

One step antiglare sol–gel coating for screens by sol–gel techniques
C. Schelle, M. Mennig, H. Krug, G. Jonschker and H. Schmidt 163

Improved mechanical performance of flat glass components through application of strength-increasing coatings
S.W. Carson and V.D. Papanu 169

Combined flow and evaporation during spin coating of complex solutions
D.P. Birnie III 174

Off-line sheet glass coating system
J.L. Buchanan and C. McKown 179

All sol–gel electrochromic system for plate glass
B. Munro, S. Krämer, P. Zapp, H. Krug and H. Schmidt 185

Sol–gel coatings on large area glass sheets for electrochromic devices
Z.A.E.P. Vroon and C.I.M.A. Spee 189

Section 4. Pre- and post-treatment

Measurement of glass surface contamination (*Invited lecture*)
A. Hattori 196

Initial stages of float glass corrosion (*Invited lecture*)
M. Feldmann and R. Weißmann 205

Pin-pointed modification of glass surfaces by using specific washing compounds
H. Schicht, M. Emonds and J. Esser 210

Excimer laser treatment for large surface (*Invited lecture*)
M. Stehle 218

Bendable and temperable solar control glass
H. Ohsaki, Y. Tachibana, K. Kadowaki, Y. Hayashi and K. Suzuki 223

Microstructure and electrical properties of Sb–Sn–O thin films
M. Kojima, H. Kato and M. Gatto 230

Controlled differential forced convection heating for glass tempering processes
K.R. Kormanyos 235

Laser firing of transparent conducting SnO_2 sol–gel coatings
D. Ganz, A. Reich and M.A. Aegerter 242

Section 5. Materials, evaluations and characterizations

Optical characterization of coated glazings at oblique angles of incidence: measurements versus model calculations.
A. Roos 247

Mechanical stress in thin SiO_2 and Ta_2O_5 films produced by reactive-low-voltage-ion-plating (RLVIP)
G.N. Strauss, N. Quang Danh and H.K. Pulker 256

Some properties of TiO_2-layers prepared by mid-frequency and dc reactive magnetron sputtering
J. Szczyrbowski, G. Bräuer, M. Ruske, G. Teschner and A. Zmelty 262

Comparative study of heteroepitaxial and polycrystalline tin-doped indium oxide films (*Invited lecture*)
M. Kamei, Y. Shigesato, I. Yasui, N. Taga and S. Takaki 267

Towards the smart window: progress in electrochromics (*Invited lecture*)
C.G. Granqvist, A. Azens, J. Isidorsson, M. Kharrazi, L. Kullman, T. Lindström, G.A. Niklasson, C.-G. Ribbing, D. Rönnow, M. Strømme Mattsson and M. Veszelei 273

Coating of transparent water-repellent thin films by plasma-enhanced CVD
O. Takai, A. Hozumi and N. Sugimoto 280

Optical surface analysis of graded index coatings on glass
M.B. Pereira and F. Horowitz 286

Characterisation of SnO_x films on architectural glass by neutron reflectometry, SIMS, CEMS and spectrophotometry
F. Caccavale, R. Coppola, A. Menelle, M. Montecchi, P. Polato and G. Principi 291

Optical measurements and modeling of an all solid state inorganic thin film electrochromic system
G. Macrelli, E. Poli, H. Demiryont and R. Götzelmann 296

Determination of directional optical properties of an electrochromic device
P.A. van Nijnatten and C.I.M.A. Spee 302

In situ characterization of chemically deposited nickel thin films on float glass by ellipsometry
E. Dumont and B. Dugnoille 307

Optical loss estimation of coatings at the ArF excimer laser wavelength
Y. Ushio, C. Takeuchi, S. Oshikawa and I. Kuwano 312

Mathematical modeling of spectral selective absorption and reflection of light by metal–dielectric composites
A. Dotsenko, S. Kuchinsky and M. Prassas 317

Properties of Ga-doped ZnO films
M. Miyazaki, K. Sato, A. Mitsui and H. Nishimura 323

Microwave plasma assisted sputtering
R. Latz, C. Daube, T. Haranou, B. Ocker and K. Suzuki 329

Section 6. Applications: new markets, emerging products, trends

Recent progress in coating technology for surface modification of automotive glass (*Keynote lecture*)
Y. Taga 335
Large area electrochromics for architectural applications
J.G.H. Mathew, S.P. Sapers, M.J. Cumbo, N.A. O'Brien, R.B. Sargent, V.P. Raksha, R.B. Lahaderne and B.P. Hichwa 342
Optical filters on linear halogen-lamps prepared by dip-coating
H. Köstlin, G. Frank, G. Hebbinghaus, H. Auding and K. Denissen 347
Large area deposition of ITO films by cluster type sputtering system
K. Ishibashi, K. Watabe, T. Sakurai, O. Okada and N. Hosokawa. 354
Thin films on glass for liquid crystal displays (*Keynote lecture*)
F.P. Fehlner. 360
Development of new coated glasses assisted by a computer program
D. Decroupet, J.M. Depauw and D. André 368
Colored coatings on eye glass lenses by noble metal colloids
M. Mennig, K. Endres, M. Schmitt and H. Schmidt 373
Development of large area sputtered solar absorber coatings
W. Graf, F. Brucker, M. Köhl, T. Tröscher, V. Wittwer and L. Herlitze 380
Crystalline silicon films on a novel high temperature glass for applications in microelectronics and photovoltaics
R.B. Bergmann, J.G. Darrant, A.R. Hyde and J.H. Werner 388
Sol–gel coatings for light trapping in crystalline thin film silicon solar cells
R. Brendel, A. Gier, M. Mennig, H. Schmidt and J.H. Werner 391
Sol–gel coatings for the substitution of fluoride or lead containing white decorations on glass
M. Mennig, A. Kalleder, G. Jonschker and H. Schmidt 395
Nanometer sized particles for viscosity controlled binders for silk screen printing
A. Kalleder, M. Mennig and H. Schmidt. 399
Single films and heat mirrors produced by plasma ion assisted deposition
J.K. Fu, G. Atanassov, Y.S. Dai, F.H. Tan and Z.Q. Mo 403
